EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Winter on 4-26-07.

The application has been amended as follows:

In claim 1, last line, after "vitamin D" - , which has an average vitamin D degradation reduction rate of at least about 20%- has been inserted.

In claim 12, last line, after "vitamin D" - , which has an average vitamin D degradation reduction rate of at least about 20%- has been inserted.

In claim 22, line 3, after "protein," - which has an average vitamin D degradation reduction rate of at least about 20%, - has been inserted.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose a method or composition, in which the nutritional formula contains Vitamin D which has been hydrolyzed to at least about 20% which is packaged aseptically into a plastic containers, which has the degree of degradation of Vitamin D

Art Unit: 1761

as claimed. The applicant found that the shelf-life stability of Vitamin D can be improved when formulated in the presence of extensively hydrolyzed protein, provided that the formula is aseptically packaged in plastic containers rather than packaged in metal contains which have been retorted. The specification contains tables, which show that the composition when packaged in plastic containers maintains the shelf-life stability of Vitamin D better than the retorted canned product.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
